

# HANDS-FREE DOOR OPENER

Reduce the risk of infection with the new door opener

An easy way to open and close doors with the elbow or forearm

Lower disease rates through effective prevention

**Integrate it in your hygiene concept now!**

Everyone touches door handles. They are particularly affected by germs - especially in places with a lot of traffic. Use hands-free door openers to simply and effectively reduce transmission possibilities of e.g. corona and influenza viruses in all areas, such as companies and public institutions.

Infection protection

No touching of door handles

Easy to clean

Easy to install

For almost all door handles

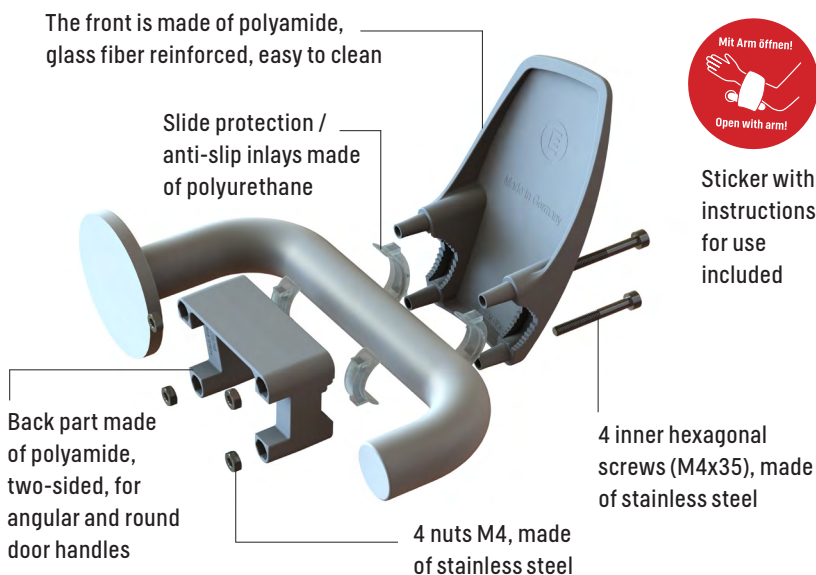

**MADE  
IN  
GERMANY**

# UNIVERSAL HANDS-FREE DOOR OPENER

## TECHNICAL SPECIFICATIONS

The hands-free door opener is suitable for the installation on round and oval door handles (diam. 15-24 mm) as well as angular handles (max. 31 mm wide). Due to the grid holder, the back part (two-sided mounting possible) and the anti-slip inlays (can be integrated if necessary) the door opener is easy and safe to install.

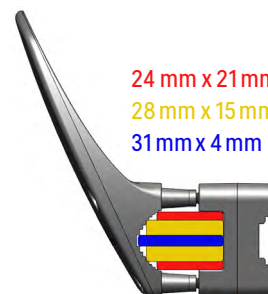

Tools required: Allen key 3 mm.

Note: Usage on fire protection and fire compartment doors must be checked individually.

Dimension of angular door handles:

24 mm x 21 mm  
28 mm x 15 mm  
31 mm x 4 mm

Dimension of round door handles:

Ø max. 24 mm
